

LAZER BOILING WATER UNIT

WALL MOUNTED

INSTALL A RHEEM™

THE SMART NEW **RHEEM** LAZER RANGE OF BOILING WATER UNITS

RHEEM LAZER - NEW ZEALAND'S MOST TRUSTED NAME IN BOILING WATER.

In an age where conserving energy and reducing carbon footprints are as much about smart business practice as they are environmental issues, Rheem have developed the most sophisticated, energy efficient range of water boilers available today. Packed with performance features, the actual unit size of the new Rheem Lazer range is exceptionally compact and with only two moving parts - one being the tap, they're - more reliable than ever.

“NOW YOU CONTROL
HOW MUCH ENERGY IT
TAKES TO HAVE BOILING
WATER ON TAP”

MORE ENERGY SAVING FEATURES

A timer is now standard on all Rheem Lazer Water Boilers, allowing you to programme when boiling water is not required so that the unit turns on and off automatically for maximum savings. What's more, a clever sleep mode senses when no one is around and powers down to conserve energy.

Programming is simple and intuitive and the backlit LED screen activates only when you need it. The new front panel displays the time, day and the mode the unit is currently operating in, while four interface buttons make setting and changing programmes a quick and easy procedure.

A single tank design is used to reduce heat loss and to retain even more heat and help cut energy use still further, we've utilised moulded CFC-free insulations.

“NO OTHER WATER
BOILING UNIT IS THIS
SMART, THIS COMPACT
OR THIS GREEN”

RHEEM BOILING WATER UNITS

COMPACT SIZE

Rheem have managed to pack all the features of this clever boiling water unit into an exceptionally compact casing and at the same time, improve performance.

The Lazer can be plumbed from underneath or the plumbing may be concealed behind the unit for a neater overall finish.

SO MUCH SMARTER

With only two moving parts the Lazer uses state of the art technology to maintain boiling water “at-the-ready” when needed. The controller is so smart it even knows its position above sea level and automatically adjusts the boiling point and unlike other models, this Water Boiler doesn’t rely on sensing cold water

temperature which means the Lazer can also be connected to a hot water supply.

As for maintenance, with handy features including a filter change indicator and self diagnostics, it couldn’t be easier or more cost effective.

BETTER RANGE

We’ve made a Rheem Lazer Water Boiler for the smallest office right through to the largest commercial kitchen with models ranging in size from 3 litre to 40 litre capacity, in a choice of White Powder coat or Brushed Stainless Steel.

“THE MOST ENERGY EFFICIENT WATER BOILER
ON THE MARKET TODAY”
