

**NEW
PRODUCT**

RJ Heavy Duty Stainless Steel

**The mains
pressure,
high capacity
storage tank.**

Stainless Steel
tanks with 850kPa
operating pressure.

**EASY TO
INSTALL**

**HIGH
PRESSURE**

**UP TO 1,000L
CAPACITY**

COMES ON STEADY, HOT AND STRONG

TECHNICAL DATA

DIMENSIONS AND TECHNICAL DATA TABLE			
MODEL			RJ1050N80
Storage Capacity		Litres	933
Dimensions & specifications			
A		mm	2170
B		mm	889
C		mm	790
F		mm	417
G		mm	879
J		mm	1803
K		mm	17
M		mm	1803
P		mm	944
Q		mm	50
Weight Empty		kg	121
Inlet/Outlet Connections BSPP		mm	RP2
TPR Valve Outlet Connection BSPP		mm	RP1
TPR Valve Setting		kPa	850
Expansion Control Valve (ECV) ¹ Setting		kPa	700
Maximum water supply pressure			
without ECV ¹ fitted		kPa	680
with ECV ¹ fitted		kPa	550
Maximum Stored Water Temperature		°C	80
Manifold - Min. Centre to Centre		mm	1250
Maintenance Rate		kWh/day	5.6
Water capacity above nominated fitting			
Storage Capacity		Litres	933
Cold Water Inlet	Dim F	Litres	796
Hot Water Flow/Return	Dim G	Litres	571
Hot Water Supply	Dim J	Litres	123

High Capacity

Available in a nominal 1000L capacity. Multiple tanks can be manifolded to store larger volumes allowing for redundancy or to spread the weight across a larger footprint.

High Performance Insulation

50mm polyurethane insulation, with a bonded painted steel cladding suitable for indoor or outdoor installation.

Polyurethane does not support fungal, mould and mildew growth, and is light weight.

Easy To Install

RJ1000 will fit through a single 900mm door and can be installed in replacement situations.

Withstands High Temperatures

Can store water up to 80°C.

More key features

- Available in fully welded 444 stainless steel for direct water applications
- Three high flow 50mm water fittings allow for typical heat pump, gas water heaters or waste heat applications
- 2 Sensor wells supplied
